

Duke Psychology and Neuroscience

Course Research Requirement

Instructors and TA Information

IMPORTANT DATES FOR SPRING 2021

Tuesday	February 2	11:59 PM	Drop / Add ends
Wednesday	February 3	9:00 AM	Subject Pool Opens - Online only; Prescreen Activated
Friday	April 23	5:00 PM	LDOC; All studies must end (no timeslots posted later than 5 pm) Paper Option Due
Saturday	April 24	1:00 PM	All credits must have been entered into Sona by researchers
Monday	April 26	5:00 PM	You will receive Semi-Final Credit Completion Report
Tuesday	April 27		Exams Begin; All papers due from students who did not complete credits required
Thursday	April 29	5:00 PM	You will receive Final Credit Completion Report.

New information

If a student opted for study participation and did not complete the requirement by the last day of studies, he/she must do the remaining credits in papers.

Participants Under 18

Studies will not be approved for students under the age of 18. These students must complete the Paper Option instead, unless their 18th Birthday falls on or prior to October 15th in Fall or March 15th in Spring. Once they reach the age of 18, they can then participate.

Research Requirement

PSY 101, PSY 102, PSY 103, PSY104, PSY105 and PSY 221 include a research requirement of 5 credit hours:

This requirement can be satisfied in one of two ways:

- (1) being a participant in research studies being conducted in the department through Sona, or
- (2) writing a critical review of 5 research articles. (Students must also email me a copy of their papers.)

Students may, however, complete a combination of the two, but they must equal 5 research hours/credits per class. (3 credits research + 2 papers = 5 credits/hours)

There is a career cap of ten hours of participation in Subject Pool Experiments. Students who have completed 10 or more hours of participation in the subject pool for previous semesters will not need to participate in studies. This is also true if the credits were earned by completing the paper option.

If students participated in less than 10 hours of studies, then participation is required until the 10 hour cap is reached.

Participation in two or more courses

If a student is enrolled in two courses this semester with the Course Research requirement, the requirement for both courses must be fulfilled, unless they have previously fulfilled hours. If the student is in three courses, he/she may choose the two courses to which credits will be documented.

Telling your students about this requirement

You could simply add a research requirement blurb to your syllabus, "See Undergraduate Instructions document available online at: <http://psychandneuro.duke.edu/undergraduate/subject-pool>

Suggested syllabus or handout text

Course Research Requirement: You must either participate in **5 hours of research OR complete 5 research requirement papers.**

The full requirement details are online at <http://psychandneuro.duke.edu/undergraduate/subject-pool> Click on "PSY Course Research Requirement" under the "Students/Participants" heading. You will be responsible for all details as described in the online document.

Failure to fulfill the research requirement for this course will result in an INCOMPLETE grade in the course. Incomplete grades are governed by University policies and it is up to your instructor to decide how to handle your final grade if you have not completed the research requirement.

Reports and credits

Throughout the semester and at the end of the semester, you will receive a spreadsheet showing the number of study credits accumulated for each student.

If a student fails to complete the required hours or papers by the end of the term, the student may complete the participation requirement in the upcoming semester, or you may choose to accept late paper(s). Until the requirement is fulfilled, the student's grade should be reported as "Incomplete." The student's Dean must be notified prior to entering an Incomplete grade.

Excuses, excuses

"Dr. X, there aren't any studies."

Students who are not participating in studies during the semester either:

- a) try to get them done during the last week and are often "poor" subjects offering unusable data
- b) do the papers

Please encourage the students to manage their time wisely and check their Sona account regularly to find studies to fit their schedules. They will also receive emails from me throughout the semester.

The penalty box – not like it used to be

Due to Federal guidelines, students can no longer be penalized for not showing up to studies for which they have appointments. **However, if a student does not show up for 2 studies that are unexcused, his or her account will be locked and the paper option must be completed.**

Human Subjects Coordinator

Please contact me if you have any questions or need any clarification regarding study participation, credits or protocol.
